

FIRST SURVEY: Survey Base

AREA COMPETENZIALI	POINTS
1. Conoscenze sullo sviluppo	SEE THE PAGE Base_punteggio
2. Conoscenze pedagogico-didattiche	SEE THE PAGE Base_punteggio
3. Conoscenze normative	SEE THE PAGE Base_punteggio
4. Conoscenze igienico-sanitarie e relative alla salute e alla sicurezza	SEE THE PAGE Base_punteggio
5. Lettura	SEE THE PAGE Base_punteggio
6. Scrittura	SEE THE PAGE Base_punteggio
7. Osservazione (tecniche/strumenti)	SEE THE PAGE Base_punteggio
8. Progettazione	SEE THE PAGE Base_punteggio
9. Documentazione	SEE THE PAGE Base_punteggio
10. Competenze specifiche	SEE THE PAGE Base_punteggio
11. Lingua 2 (inglese)	SEE THE PAGE Base_punteggio
12. Competenze digitali	SEE THE PAGE Base_punteggio

OPERATIONS:

Each Area has to be a step, in the end we have to match each area to a course or courses and books from other platform.

Also for each area competenziali we need to correlate the message for each points range (the comments in Base_punteggio).

LMS:

On lms we need to connect courses to a particular area competenziali (the field should be populated automatically when we add an area in wp form) e need to select the level Elementare, Intermedio e Avanzato.

The area competenziali should be automatically populated in lms as an advanced custom field.

EXAMPLES:

1. SUM OF POINTS FROM AREA **Conoscenze sullo sviluppo** → 6 → Intermedio → We have to bring out the courses and books from ≥ 6 and ≤ 7 for this area
2. SUM OF POINTS FROM ARE **Osservare (Tecniche/strumenti)** → 10 → Intermedio → We have to bring out the courses from ≥ 10 and ≤ 14 for this area.
3. SUM OF POINTS FROM → Conoscenze normative → 19 → We have to bring out the courses and books from ≥ 16 and $23 \leq$ → also the comment

ACF Should be like this in LMS for the course selection:

SURVEY SELECTION
AREA COMPETENZIALI
LEVEL (Elementare. Intermedio. Avanzato)
